

Flood Risk and Modelling Analyst

Salary - £27,000 to £33,408

Manby, Louth, Lincolnshire

Local Government Pension Scheme, Nine-day working fortnight, 23-27 days annual leave plus all bank holidays and 3 additional stat days.

We have an exciting career opportunity within our Engineering Team for a Flood Risk and Modelling Analyst.

This is an ideal role for someone who has an analytical mindset and who is motivated to develop their career in the improvement of our environment in terms of effective land water management.

The right candidate for the role will have a sound knowledge and experience of hydrological and hydraulic modelling to be able to influence the right solutions to water level management and flood risk issues.

This role will report to the Flood Risk and Modelling Advisor, to support in the preliminary designs and feasibility options for flood risk management assets and prepare business cases for government grant aid.

Experience of working in collaboration with engineering specialists and other key stakeholders to provide technical advice and to conduct technical surveys is essential.

If you are highly driven to succeed, organised, accountable and responsive to the fast pace and changing demands of our service to our communities, we would like to hear from you.

For further details about the role contact us on 01507 328095. If you believe you have the right skills for this role please apply through Indeed or send your CV to enquiries@lmdb.co.uk
